

Price sheet 2023 – 50Hertz Transmission GmbH

**For access to the transmission grid in the control area of 50Hertz Transmission GmbH
(valid from 01/01/2023 till 31/12/2023)**

In accordance with the provisions of the Incentive Regulation Ordinance (ARegV), 50Hertz Transmission GmbH has determined the revenue cap for the fiscal year 2023. In view of this and the projected sales structure for all customers directly connected to the 50Hertz grid, as well as the legal stipulations, the grid charges were determined for the year 2023. The prices in this price sheet are net prices, to which the legally imposed VAT (currently 19%) has to be added.

If the revenue cap is adjusted or if a new revenue cap is fixed in 2023 as a result of official and/or court decisions, or if an adjustment is required within the year by legal or regulatory stipulations, the grid charges are also redefined insofar as legally admissible. This may make it necessary to request grid charges for periods that have already ended, possible even after termination of the grid use for the relevant outflow points. The terms of payment for arrears, which are subject to the basic interest that applies for the relevant period as per § 247 of the Civil Code, are communicated in advance.

For inquiries about prices, price elements, pricing methods and further details, please contact our Grid Connection / Grid Use Management department,
Ms Cornelia Boldt, phone: 030 – 51 50 21 69.

More in particular, the 50Hertz price sheet contains the:

- ◆ Prices for grid use
- ◆ Prices for metering point operation and
- ◆ Prices for individual use of reactive energy outside the scope of the contract

Additionally, legal surcharges apply. The amount of the currently applicable legal surcharges as well as additional information on the surcharges can be consulted on the common online platform of the German TSOs (only available in German): www.netztransparenz.de

Prices for grid use

Annual utilisation time	< 2.500 h	≥ 2.500 h
Annual capacity charge (€/kW*a)		
for energy volumes taken from the EHV grid	11,85	72,49
for energy volumes taken from transformer substations (EHV/HV)	16,67	81,87
Energy price (ct/kWh)		
for energy volumes taken from the EHV grid	2,95	0,53
for energy volumes taken from transformer substations (EHV/HV)	2,94	0,33

Prices for metering point operation per counting point

		EHV and EHV/HV	MV and LV
Metering point operation	annual price	2.086,00 €	439,00 €
	monthly price	173,83 €	36,58 €

Information: If 50Hertz starts to roll out smart meters in 2023, the respective prices for metering point operation will be published according to the legal provisions.

Prices for individual use of reactive energy outside the scope of the contract

In addition to the grid use charges, transmission system operator 50Hertz Transmission GmbH imposes the following additional costs for exceeding the contractually agreed limit values for reactive energy:

Consumption of reactive energy	energy price (ct/kvarh)
during high-load hours (in case of consumption > 40% of the active power acquired)	0,29
Feed-in of reactive energy	
during low-load hours (in case of feed-in > 15% of the active power acquired)	0,23

Load hours	Mon - Fri	Sat / Sun and German national holidays
High-load hours	06:00 - 22:00 hours	08:00 - 13:00 hours
Low-load hours	22:00 - 06:00 hours	13:00 - 08:00 hours

Overview of German official national holidays for 2023 (Mon-Fri)

New Year's Day	01/01/2023	Ascension	18/05/2023
Good Friday	07/04/2023	Whit Monday	29/05/2023
