The diagram illustrates a power line axis (Leitungsachse) with various markers and symbols. At the top left, boxes labeled 18 WA2-0, 19 T1-5, and 20 T2-0 indicate specific locations along the axis. The axis itself is shown as a line with a solid black dot at approximately 200m and an open circle at approximately 450m. Below the axis, labels identify 'Abspannmast' (spanning tower) at the solid dot and 'Tragmast' (carrying tower) at the open circle. A blue line segment connects these two points. To the right of the axis, a label 'Mastart' (start of pole) is shown with a line pointing to the right. Further along the axis, two blue circles are marked with the numbers 190 and 191, followed by the text 'Demontage/Rückbau' (demolition/undoing). Below the axis, a horizontal line with two open squares is labeled 'Bestehende Leitungen' (existing lines). A scale bar at the bottom shows distances from 0 to 1000 meters.
